

# Lines On Sides – Steam Release Notes

## Description

Lines On Sides is a minimalistic puzzle game. The player's task is to arrange the tiles so that their sides match each other by color/symbol. When the color is arranged correctly, black lines appear indicating a correct connection. Tiles can be rotated, moved, split, and even copied. Tiles with all active lines allow to advance to the next level. In the game, the player must guess how to complete the level and how a given mechanic works. In the case of more difficult mechanics, a rule guide is available, thanks to which there is a chance to complete the game. :) The game does not impose the pace of the game. During the game, the player will be accompanied by calm music and carefully selected sounds that emphasize the relaxing atmosphere of the game.

## Features
